

Our solutions for this sector allow businesses to meet high quality and quantity demands of international brands and retailers.

Meeting the large quantity-based and deadline-driven demands of international fashion industry giants can be a daunting task. To meet their desired outputs, efficient workflows and management processes are needed to keep your business going. Tech One offers solutions to improve the way you do business, maintain and increase your client base, and lead the way to your company's growth.

For companies in the Apparel and Garment Industries, we offer the following services:

- Development and implementation of Document Management Environments
- Development of Intranet Sites and Workflows using MOSS
- SharePoint-based Document Management and Workflows
- Digitization of company documents, financial records, transactions, and legal documents
- And many others

The workflows we devise to help organizations maintain productivity levels meet ISO standards of international quality.

The Tech One team of well-trained professionals is certified by CompTIA CDIA+ (Certified Document Imaging Architect), and PMP-PMI (Project Management Professionals). Rest assured that Tech One has the best human resources in the industry to help you realize your business goals.
