

Insurance companies have outsourced our digitization services to process a variety of paperwork in order to attend to clients' needs on time.

Just as your company looks forward to improve the quality of life of its consumers, especially in times of need, Tech One offers your business the option to concentrate on making things better for them, while we take care of your day-to-day business processes.

Tech One offers document management solutions to make it easier for your company to handle files, finances, and frequent coverage requests. Tech One's clients in the insurance and risk management sector have benefited from the following services:

- Digitization and Indexing services for files such as corporate, life, and vehicle insurance records, customer applications and supporting documents, legal and financial documents, etc.
- Archives/Backlog Conversion of digitized documents
- Online Data Entry and Data Extraction
- Report Generation and Full-text File Generation
- Forms Processing Services
- Document Imaging Solutions
- And many more

Making files available digitally grants insurance and risk management companies easy accessibility and organization to paperwork, allowing for the faster processing of claims.

The Tech One team of well-trained professionals is certified by CompTIA CDIA+ (Certified Document Imaging Architect), and PMP-PMI (Project Management Professionals). Rest assured that Tech One has the best human resources in the industry to help you realize your business goals.
